FINISHING FIRST

Range of tensioning multi-finisners for shirts and outerwear, either laundered or dry-cleaned. These units are particularly recommended for dry-cleaning shops, hotels and nursing homes.

With the new "AF LOGIC" controls, the operator can switch from one mode to another by SIMPLY pressing a key, thus automatically setting the unit to operate according to the required parameters.

404 new pneumatic trolley for fast and accurate alignment with the shirt hem, two air-operated side clamps which can pneumatically expand on cycle start, and one air-operated rear clamp. Pneumatic closing of the front paddle, with steam-heated vacuum counter-paddle for an easier dressing of shirts and outerwear. Manual collar locking system. Available with photocell on rear clamp and pneumatic rotating sleeve clamps, which are particularly recommended for finishing shirt sleeves.

This shirt unit doesn't require trained personnel. A few hours of practice are enough to achieve excellent results and stunning performances, indeed.

This unit features three operation modes:

- SHIRT, for shirts and lab-coats
- WET, for wet-cleaned outerwear
- DRY, for dry-cleaned outerwear.

Included as standard:

- padded flexible paddles to prevent: shine marks on dark fabrics, paddle pressure marks, button marks on the shirt;
- two front interchangeable paddles;
- cycle-extension button;
- manual cycles available;
- electric iron for touch-ups.
