

MPT-DP2

PANTS TOPPERS

PONY USA
FINISHING FIRST

MPT-DP2 has been expressly designed and developed for industrial output. The special framework and the automatic cycles allow a very high hourly output. Cycles are adjustable by microprocessor. The MPT series is the right solution to process any sort of trousers: jeans, "casual" or "classic" trousers.

Features:

- pneumatic tensioning of the waist, with front paddle and with anatomic, heated form with pleat paddles to fix the waist darts and set the pleats;
- the pleat paddles can be excluded;
- pneumatic trolley for tensioning the legs with independent, pivoting clamps;
- ready for central steam and air supplies.

TECHNICAL DATA	MPT-DP2
REQUIRED POWER	230/3 V/60 Hz
BLOWING MOTOR	230/3/60 Hz
STEAM INLET	1/2"
RETURN OUTLET	1/2"
STEAM CONSUMPTION	15 ÷ 20 kg/h
STEAM WORKING PRESSURE	58 ÷ 87psi
AIR INLET	1/4"
AIR WORKING PRESSURE	116÷145 psi
AIR COMSUMPTION	0,32 cubic fett/cycle
DIMENSIONS	45 x 110 x 74 in max
NET WEIGHT	391 Lbs
GROSS WEIGHT	430 Lbs
PACKAGE DIMENSIONS	87x27x53 in
VOLUME	71,69 ft3
